Clinical psychologist with expertise in PTSD, assessment, and psychological / neuropsychological testing. 15 years of experience conducting comprehensive evaluations across clinical, medical, and forensic settings. Licensed in Massachusetts, Rhode Island, Texas and all PsyPact states. Extensive expertise in neuropsychological and psychological testing. I have completed hundreds (likely over a thousand neuropsychological reports) and provide 2-3 comprehensive testing batteries and reports a week.

I am faculty and Associate Training Director at Tufts University School of Medicine, where I teach and supervise psychology trainees and psychiatry residents in psychological and neuropsychological assessment, time limited psychotherapy, and clinical hypnosis. Trained at multiple VA Medical Centers and attended weekly clinical meetings at the National Center for PTSD, developing strong expertise in trauma-related disorders. Received 3 years of neuropsychological training and direct supervision prior to obtaining my doctoral degree. My practice incorporates advanced training in clinical and medical hypnosis, time limited psychotherapy and comprehensive assessments. I evaluate complex presentations including traumatic brain injury, neurocognitive disorders, Autism Spectrum Disorder, chronic pain, somatic symptom and functional neurological disorders, ADHD, and functional cognitive impairment. I conduct disability evaluations, personal injury assessments, and consultations regarding medical necessity for neuropsychological testing.

I have been retained as an expert witness in civil cases for both the plaintiff and defendant. These cases have involved rebuttals to neuropsychological testing interpretation, causation and nexus analysis of PTSD and other diagnoses, review of neuropsychological records, medical malpractice, IME's (hundreds completed), undue influence, and personal injury. I have provided hundreds of IMO's for combat veterans and administer multiple compensation and pension exams for veteran's weekly.

Work Experience

Clinical Psychologist, Faculty, Associate Training Director, Co-Director of Neuropsychological Testing Seminar *Tufts Medical Center & Tufts University School of Medicine – Boston, MA May 2021 – Present*

- Provide neuropsychological testing for differential diagnosis (TBI, ADHD, ASD, Neurocognitive Disorders) and treatment planning.
- Deliver rapid and comprehensive psychological assessments for diagnostic clarity, competency, risk, and disability evaluations; this includes psychotic differentials and personality testing.
- Co-Direct Neuropsychological Testing Seminar and teach methods and interpretation of neuropsychology.
- Teach didactics in psychology and neuropsychological testing at Tufts University School of Medicine as well as at Tufts Medical Center
- Supervise pre doctoral psychology trainees in neuropsychological assessment and clinical psychology assessment; train pre doctoral psychology trainees in test administration, test interpretation, report writing, diagnostic clarity, and treatment planning.
- Provide time limited psychotherapy for mental health disorders as well as medical conditions such as chronic pain, insomnia, migraines, weight control, and smoking cessation.
- Direct Hypnosis Clinic; supervise residents and advanced practicum students in clinical hypnosis applications.

Veteran Compensation & Pension Evaluator *Veterans Evaluation Services (VES) – Providence, RI July 2023 – Present*

- Conduct Compensation & Pension (C&P) examinations to determine service connection and benefit eligibility.
- Provide Independent Medical Evaluations (IME) and Independent Medical Opinions (IMO) to make nexus, causation, and level of impairment determinations. Conditions include TBI, toxic exposure, and complex medical conditions resulting in neurocognitive disorder as well as combat PTSD.
- Diagnose mental health disorders and evaluate functional impairment.
- Integrate history, observations, and test data into comprehensive diagnostic reports for VA adjudication.

Psychologist / Owner-Operator *Moonlight Psychological Services, LLC – Cranston, RI Jan 2017 – Present*

- Provide neuropsychological and psychological evaluations and reports as an expert witness; provide IME's.
- Provide Fitness for Duty evaluations for Baylor College of Medicine as independent contractor. These include combination of neuropsychological and psychological testing and assessment.
- Conduct assessments for PTSD, Cognitive Impairments, C-PTSD, ADHD, ASD, TBI, and complex diagnostic clarification including veteran appeals for benefits.
- Provide comprehensive neuropsychological and psychological assessment reports for individuals needing academic accommodations and accommodations in standardized testing.
- Provide neuropsychological and psychological testing for individuals applying for disability due to cognitive and emotional impairment.
- Provide expert witness testimony and Independent Medical Evaluations (IME) and opinions (IMO)
- Review appeals for long term disability through ePriori Health; conditions include neurocognitive disorders, PTSD, and cognitive impairment.

Clinical Psychologist & Medical Director, Adult Therapy/Behavioral Health Services *Gundersen Health System – La Crosse, WI Sep 2017 – May 2021*

- Directed adult therapy services; supervised clinicians, developed treatment programs, and set clinical policy.
- Conducted psychological and neuropsychological assessments for diagnostic clarity, competency, disability applications, treatment considerations, and level of cognitive impairment.
- Provided evidence-based psychotherapy (CBT, CPT, IPT, psychodynamic approaches).
- Developed and trialed a two-session hypnotic protocol for smoking cessation.

Staff Psychologist *VA Medical Center / CBOC – White River Junction, VT Sep 2015 – Sep 2017*

- Delivered same-day assessments and short-term interventions in integrated care settings.
- Conducted neuropsychological testing for differential diagnoses, cognitive impairment, and treatment planning.

- Provided individual and group psychotherapy for veterans with PTSD, depression, insomnia, and dual diagnoses.
- Led psychotherapy groups including "Combat Trauma" and "Phase of Life Transitions."
- Applied clinical hypnosis for anxiety, smoking cessation, and somatic conditions.

APA-Accredited Internship *Albany Stratton VAMC, Capital District Psychiatric Center, Albany Medical Center Sep 2014 – Sep 2015*

- Completed rotations in PTSD Clinic, inpatient psychiatry, and behavioral health.
- Conducted psychological and neuropsychological assessments for veterans with complex presentations, including patients on the inpatient unit, and outpatients at the Albany Medical Center.
- Delivered evidence-based treatments (CPT, TLDP, IST, integrative psychotherapy).
- Co-led PTSD process group "Seeking Strength" and collaborated with interdisciplinary teams.

Training & Related Experience

Senior Graduate Research Assistant *Center for Research on Psychological Practice (CROPP), Antioch University New England May 2010 – Sep 2014*

- Managed Community Readiness Assessment project for Healthy Monadnock 2020; trained and supervised interns.
- Analyzed data, recommended interventions, and presented findings at 2014 ACHI Conference (Orlando, FL).
- Conducted fidelity assessments for UMASS Lowell Suicide Prevention trainings.
- Co-initiated project to improve early engagement and reduce attrition at Psychological Services Center.

Advanced Practicum Clinician *Williams College – Sep 2013 – May 2014*

- Provided individual and group psychotherapy to diverse student population.
- Delivered acute services via "Let's Talk" outreach program.
- Received training in psychodynamic case conceptualization and multicultural clinical practice.

- Presented cases at weekly supervised case conferences.

Practicum Clinician *White River Junction VA Medical Center – Sep 2012 – May 2013*

- Provided psychotherapy, psychological and neuropsychological assessment for veterans in outpatient and inpatient units.
- Co-led "Mindfulness/Relaxation/Meditation" and WRAP groups.
- Completed integrated assessment batteries for cognitive and diagnostic clarification including ADHD, TBI and cognitive impairment.
- Participated in case conferences, journal clubs, and PTSD grand rounds. Engaged weekly at the National Center for PTSD for training in evidence based treatments, assessments, and neuropsychological considerations for veteran assessments.

Practicum Clinician *Antioch Psychological Services Center – Sep 2011 – Jun 2012*

- Conducted psychotherapy (individual, couples, family) and psychological assessment with adults and adolescents.
- Completed integrated neuropsychological assessment batteries using cognitive, projective, personality, and neuropsychological tests. Presenting problems included ADHD differential assessment, learning disabilities, functional assessments, and cognitive impairments.
- Participated in weekly supervision and didactic trainings on evidence-based treatments, suicide assessment, hypnotherapy, psychological and neuropsychological testing, and ethics.
